SUBJECT: FIELD UNIT 1 SAMPLING ACTIVITIES AT TA-21, MDA T

Dear Mr. Garcia:

Field Unit 1 is planning to start sampling activities at Technical Area 21, Material Disposal Area T on or about November 11, 1996, through approximately March 30, 1997. These activities will include drilling and subsurface soil sampling of approximately 17 vertical boreholes and 3 angled boreholes at Potential Release Sites (PRSs) 21-016(a-c) and 21-011(c). Since all of the PRSs are located closely together, the drilling and sampling will characterize them together and not individually.

Samples will be collected as shown in the table below.

Location	Number of Samples	Sample Type	Analyses
PRS 21-016(a-c) and 21-011(c)	176	subsurface soil	VOCs, SVOCs, TAL metals, gamma spectroscopy, total uranium, isotopic plutonium, tritium, strontium-90

If you have any questions or concerns, please call me at (505) 667-0819.

Sincerely,

David McInroy
Environmental Restoration Project
