SUBJECT: NOTICE OF PROJECT SHUT DOWN FOR VOLUNTARY CORRECTIVE ACTION AT TECHNICAL AREA 21, POTENTIAL RELEASE SITE 21-024(f) AND AREA OF CONCERN C-21-015

Dear Mr. Kieling:

The Los Alamos National Laboratory (LANL) Environmental Restoration (ER) Project is notifying the New Mexico Environment Department Hazardous and Radioactive Materials Bureau (NMED-HRMB) that the Voluntary Corrective Action (VCA) and corresponding sampling scheduled for the week of August 23, 1999 at Potential Release Site (PRS 21-024(f) and Area of Concern (AOC) C-21-015 has been shut down. The ER Project submitted a 10-day notification letter to NMED-HRMB (E/ER:99-201) regarding the collection of samples from beneath the former sump, septic tank, and outfall area. However, based upon a recent review of the ER Project's baseline prioritization criteria, these sites are not considered mandatory, and as such all activities have been suspended. At this time, there are no VCA activities planned for either site during Fiscal Year 2000 (FY00) or FY01. LANL will notify NMED-HRMB when VCA activities are scheduled to re-start.

If you have any questions or concerns please call Deba Daymon at (505) 667-9021 or me at (505) 667-0819.

Sincerely,

Dave McInroy
 Environmental Restoration Project
