Paula:

NMED will conduct a thorough review of the Rev. 2 21-011(k) VCM Plan submitted October 31, 2002 and referenced by LA-UR-02-0745. Based on a quick scan through the report, Figures 2.2-3, 2.2-4, and 3.0-2. must be revised and resubmitted. As discussed during review of the First VCM for 21-011(k) dated April 19, 2002 (LA-UR- 02-2218) and its subsequent revision dated July 1, 2002 (LA-UR-02-3807) all Figures displaying data using a colormetric scale must be provided in color.

I just wanted to give you heads up on the Figures. Please do not resubmit the Figures at this time. I will conduct a technical review and provide formal comments (including a comment regarding the Figures) to you.

Thanks,  
Vickie

Thanks for the heads up Vickie, we apologize for the poor figures, and greatly appreciate the quick review. Please feel free to give me a call with any questions.
