Becky,

NMED received your response to the second notice of deficiency (NOD) for the Voluntary Corrective Action Completion Report Addendum for SWMU 21-013(d)-99. LANL has agreed to collect additional samples for chromium, copper, and nickel at the locations listed in the NOD. NMED approves this response and the proposed additional work. LANL must submit a sampling notification prior to starting field work. Please call me if you have any questions.
