Remarks:

Questions about WP:

① Exact dimensions of beds? They're not really sure. The trenches they dug in 2001 spanned the width of the beds (~20). They are probably close to the eng. drawings, but not definite.

② where was the trench that was excavated in 1985? Trench was down the center of the beds, east to west. All piping was removed as well as the distribution box. There were no good records kept of where exactly the trench was excavated. However, there was a plastic liner placed where material had been removed. They have run into that liner during sampling events.
