**Subject:** AOC Delineation Request  
**Attachments:**

Becky,

NMED is in receipt of the "Request for Approval of an Area of Contamination for the Investigation and Remediation of Consolidated Unit 21-018(a)-99, Material Disposal Area (MDA) V" dated September 8, 2005. This email will serve as written preliminary approval of the area of contamination designation for MDA V. A formal approval letter will follow.

The approval letter will specify that the Permittees may not utilize the Area of Contamination concept for returning media to its point of origin (as stated by the Permittees in their request letter). The Area of Contamination may be used solely for facilitating the staging and segregation of remediation wastes on-site. The approval will also state that supplemental sampling may be required for staging areas located outside of the original SWMU boundary and not included in the waste management portion of the work plan. Additionally, if the Permittees can demonstrate that no releases occurred and/or areas within the AOC were not utilized, additional sampling will not be required in those areas.

If you have any questions, please feel free to contact me.

Katie
