Summary of Discussion:

Called looking for David Salazar. He is on leave right now but talked with David Moss who verified that there was a pug mill on-site used to pump the tanks but was unsure what happened to the rinse water used for decontamination. David Moss said he would call Salazar and have him call me when he can. David Salazar: (505) 667-6904

12:30: David Moss called back -- talked with Salazar who confirmed that the shafts were drilled but never used and were eventually grouted up. David Salazar should be back in the office in a couple of weeks if we have more questions. He is out on medical leave.
