Mark,

Based on the analytical data you provided on 8/16/06, NMED will not require additional dioxin/furan analysis at 21-013(c). We will make a decision regarding additional HE sampling once we've received and reviewed the HE results.

Thanks,
Katie

Katie, here is the write up for the 21-013(c) dioxin/furan samples. I am faxing the data, map, and daily report. Two samples were collected at this location and analyzed. I will call you in the morning to discuss the results.

Mark
