As agreed in the Order on Consent between the New Mexico Environment Department and the Department of Energy, MDA B is scheduled for remediation. Activities began in 2006 and will extend into 2009. MDA B is located on the south side of DP Road in Los Alamos County. It was the first disposal area for waste generated at the Laboratory and was used from 1944 until 1948.

The LANL Environmental Remediation Program is holding a meeting to inform the public about progress of this activity, to answer questions and to collect feedback from any interested individuals.
