Subject: Request for an Extension for the Phase II Work Plan for Consolidated Unit 21-016(A)-99, Material Disposal Area T, at Technical Area 21

Dear Mr. Bearzi:

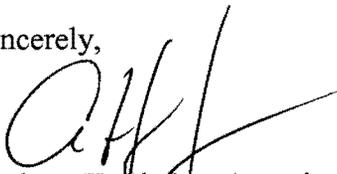

Los Alamos National Laboratory (LANL) requests a 30-day extension to the submission date for the “Phase II Work Plan for Consolidated Unit 21-016(A)-99, Material Disposal Area T, at Technical Area 21.” The Department of Energy (DOE) and LANL appreciate the meeting held on January 30, 2006 with your technical staff to gain clarification on the Approval with Direction. This clarification helped to agree on a format for the Phase II Work Plan and focus the responses which will be included in the Work Plan.

This extension request would allow time to finalize the technical approach to the required additional work, conduct the decision peer review in accordance with LANL’s Environmental Programs - Environmental Remediation and Support Services Standard Operating Procedure 4005, obtain DOE approval, and develop a schedule for the additional work and submittal of the Phase II Investigation Report. LANL will integrate this work with other ongoing Delta Prime Aggregate work to gain efficiencies.

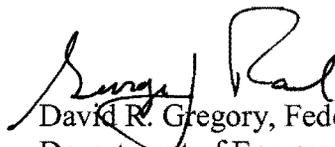

If you have questions, please contact Mark Thacker (505) 699-1963 (mthacker@lanl.gov) or Woody Woodworth at (505) 665-5820 (lwoodworth@doeal.gov).

Sincerely,

Andrew K. Phelps, Associate Director
Environmental Programs
Los Alamos National Laboratory

Sincerely,

David R. Gregory, Federal Project Director
Department of Energy
Los Alamos Site Office
