Subject: RE: Extended Suite Sampling (21-022(h)-99, 21-023(a)-99, 21-024(d), 21-024(i))

Thank you very much for the quick review Katie. LANL will collect samples from locations 19 (up slope) and 25 (down slope) at SWMU 21-024(d) for dioxin/furans and PCB analyses. Snowing like a big dog up here.

Mark

Subject: Extended Suite Sampling (21-022(h)-99, 21-023(a)-99, 21-024(d), 21-024(i))

Mark,

NMED is in receipt of the extended suite sampling for SWMUs 21-022(h)-99, 21-023(a)-99, 21-024(d), 21-024(i). NMED has reviewed the data and determined that no further sampling for PCBs, dioxins/furans, and high explosives is required at SWMUs 21-022(h)-99, 21-023(a)-99, and 21-024(i).

The dioxin/furan TEQ (21.2) and the concentration of Aroclor-1254 (129 ug/kg) are below regulatory cleanup levels. However, the fact that both dioxins/furans and PCBs were found at elevated levels at this location in comparison to other SWMUs and AOCs in the area, is cause for concern.

The Permittees must conduct additional dioxin/furan and PCB sampling at locations 19 and 25 at SWMU 21-024(d).

Please let me know if you have any questions.

Katie
