Ms. Kathryn Chamberlain
Environmental Scientist
Hazardous Waste Bureau
New Mexico Environment Department
2905 Rodeo Park Drive East, Bldg. 1
Santa Fe, NM 87505-6303

Dear Ms. Chamberlain:

SUBJECT: TA-21-57 ABOVEGROUND STORAGE TANK CHARACTERIZATION UPDATE

On August 21, 2006, the Laboratory notified your office of plans to conduct additional site characterization work near TA-21-57 aboveground storage tank (AST) in Fiscal Year (FY) 2007. Due to availability of drillers, major changes in Laboratory management, and funding constraints, the Laboratory was unable to complete the planned characterization work. However, the Laboratory has re-scheduled the characterization work at TA-21-57 AST for FY 2009 when drilling contractors and funding become available.

The operational release of fuel at TA-21-57 is located near several solid waste management units (SWMUs) and areas of concern (AOCs). It is therefore, appropriate to consider the results of additional characterization in conjunction with the results of characterization of SWMUs and AOCs at TA-21. The results of additional characterization work at TA-21-57 will be presented in the Phase II Investigation Report for the Delta Prime Site Aggregate Area.

Please contact Mark Haagenstad of ENV-RCRA at (505) 665-2014 if additional information would be helpful.

Sincerely,

Dr. Marie Sandoval DGL

for Anthony R. Grieggs
Group Leader
Water Quality & RCRA Group (ENV-RCRA)
