Subject: MDA T

Bruce,
In regards to our phone call this morning (April 10, 2009):

For the deep hole at North Perimeter Road, in the work plan provide a contingency plan if vapor ports cannot be installed to the depth of the hole (i.e., packer samples will be taken if ports cannot be installed).

Would it be possible to send us information regarding the 1/4in stainless steel tubing (e.g. manufacturer information, technical details).

Additionally, you owe us a document regarding vapor intrusion at MDA T. The March 28, 2008 *Approval with Modifications Phase II Investigation Report, Material Disposal Area (MDA) T at Technical Area (TA) 21, Revision 1.0* called for "a vapor intrusion assessment within 90 days of the final quarterly sampling event" submitted to NMED as a separate document. The document needs to discuss vapor intrusion and also future use of the land.

If you have any questions, feel free to contact me.
