Subject: MDA V Vapor-Monitoring Well Installation

Ron,

I have completed a preliminary review of the *Vadose Zone Subsurface Characterization and Vapor-Monitoring Well Installation Work Plan for MDA V, Consolidated Unit 21-018(a)-99* (Plan) and NMED hereby grants preliminary approval of the Plan so that drilling activities may commence. NMED generally concurs with the drilling methodology, sampling intervals, and proposed vapor-sampling port depths; however, NMED will send formal comments shortly.

Please be sure to contact NMED if you have any problems in the field (e.g. difficulties with drilling equipment, you encounter a perched zone, trouble with well installation) and to discuss the final well design.

Thanks,
Katie
