**Subject:** RE: MDA V

Bruce,

Based on our conversation yesterday (10/14/09), NMED has determined that installation of ports 8 and 9 at MDA V are not required at this time. NMED will reevaluate the need for analytical data at the depth intervals of ports 8 and 9 following review of the first and second quarter pore-gas sampling data. The First Quarter Vapor Monitoring Report for MDA V is due on January 2, 2010.

Please let me know if you have any questions.

Thanks,  
Katie

Hi Katie,

After you talk to David Cobrain about MDA V please send me an e-mail with your decision or call Ron Rager (231-7834) because my phone is still not working properly.

Thanks,

Bruce Wedgeworth
