MDA B borehole sampling
7.15.11

C.F. on site @ 0830 — sampling crew: C. PERRINS, C. CHRISTENSEN
VERY smoky!
- borehole slightly WL of R51 (Enc 9 area)
- hole # drilled yesterday = 7.14.11 at
  samples split w/ LANL/NMED for
  1 tal U, Sr-90, Cl⁻, (650' TD)
  (small discrete area of dirt)
- bit used for 7.14.11 drilling
  reading 5000 dpm for alpha this
  AM; samples swiped out okay
  according to Candace
- holes backfilled w/ bentonite pellets + water pumped in
- THIS HOLE: NO CORE RECOVERY INSTINCTLY TO
  GET DRY & 'CLEAN' (Enc 9 fill)
  - drilling begins 0856
  - clean fill shoveled Sr. around & bagged
    into plastic
  - cobbles ~7'-9' ?? (fill)
  - " ~12' (fill)
  - core barrel in 15'-20', ~2' of core
    plastic & glass bottle dirt ← (still fill)
  - core barrel in 20'-25'
  - out 0953

34956

7-15-11

- sample of core from 20'-25' cont'd
  - tuff @ 21½'
- sampler breaks off portion of core (-1')
  from bottom of core + put into stainless steel bowl - not used, will be discarded
- breaking pieces off from 21½'-24' into (10:03)
  stainless steel container, using rock hammer
  - all equipment decontaminated + Fantastik
  - Rad tech scanning core during crushing
  - core pieces smashed + rock hammer to get 'enough powder' to fill sample containers, homogenized mixed in container
  - bottles filled with extra using stainless steel scoop
  - Sold screened for volatiles

Location ID: MDAB614493

Sample ID: DSMOA13-11-27290

S. Yniesta

Bill O'Neill (Interested Party) 10/19/10 ~10:30

MDA + B

Encl. #7 B. 195 Confirmatory Sampling

RCT: <20 cpm @ bucket for release ~10:30 + 11:30 ~1 backhoe

N. Wall - excavated small area ~1/2 ft. wide, excav. fill to bottom of trench, some of this fill on wall in bucket, bucket set on plastic, sample team breaks up sample + homogenizes in stainless steel tub, sieved crushed sample into stainless steel bowl, steel scoop into sample bottles, clean ext. exterior bottle w/ Fantastik, cleaned/covered equip, bucket cleaned between

FILTER - ~11:15 - 12:45 same as above

S. Wall - ~12:45 sampler on extended boom across trench, made excavation on wall side, same
