RE: Temporary Permission to Discharge, New Sanitary Septic Tank/Leachfield System at Technical Area 33 (TA-33), DP-1589

Dear Mr. Beers:

The New Mexico Environment Department (NMED) has reviewed your request, dated August 13, 2015, for temporary permission to discharge domestic wastewater from four buildings (168, 114, 19, and 280) located in Technical Area (TA)-33 of the Los Alamos National Laboratory (LANL) to a new septic tank/leachfield disposal system (TA-33-0375). The proposed discharge is located in TA-33, approximately 7.15 miles southeast of Los Alamos, in Section 24, T18N, R06E, Los Alamos County.

Temporary permission to discharge is hereby granted for 120 days pursuant to Subsection B of 20.6.2.3106 NMAC of the New Mexico Water Quality Control Commission Regulations. This approval is contingent on your discharging as described in your August 14, 2015 request and other correspondence with NMED Ground Water Quality Bureau staff as applicable and is only for waste from domestic sources. Temporary permission to discharge will expire on December 29, 2015.

This approval does not relieve you of the responsibility to comply with any other applicable federal, state, and/or local laws and regulations, zoning requirements, and nuisance ordinances. Also, this approval does not relieve you of liability should your operation result in actual pollution of ground or surface waters.
