Re: Underground Chamber No. 2, TA-33
Job No. 1186

Los Alamos Scientific Laboratory
Construction and Maintenance Group
Los Alamos, New Mexico

Attention: Mr. R. C. Hill

Gentlemen:

There is attached three copies of Robberson Steel Company shop drawings No. 48-599, Sheet No. 1 covering details of plate doors required for Underground Chamber No. 2, above project.

Please note that, contrary to the information furnished to Mr. Hill, that Robberson Steel Company has indicated the door as 6'-10" high to correspond with contract drawings. We assume that there would be no question regarding this item and the doors plus the reinforcing steel are leaving Robberson's plant August 23.

We will appreciate your verification of the appropriateness of these details, otherwise they are simply for your files and field use.

Very truly yours,

ROBERT E. MCKEE, GENERAL CONTRACTOR
