

TA-33-Chamber #2

March 22, 1949

W. C. O'Rourke, Chief, A.E.C. Construction Division

Los Alamos Scientific Laboratory, Construction and Maintenance Group

LAB JOB 104, UNDERGROUND CHAMBER #2, TA-33, CONTRACT AT-(29-1)-481

REFERENCE: LAB ENG-4

1. Your memorandum to Mr. Pittmar of March 16, 1949 regarding Government furnished material on the subject job has been handed to this office for reply.
2. The "Government" furnished material called for under the plans and specifications for the subject job was actually supplied to the contractor in the following manner:
 - a. "1 each elevator building on skids, complete with electric elevator installation." This building and elevator installation were at the site, having been salvaged after the use of Underground Chamber #1.
 - b. "All necessary elevator parts for shaft installations." Some of these had been salvaged from the Underground Chamber #1 installation before its use and others were ordered by the University of California and furnished the contractor at the site.
 - c. "All necessary duct work." All necessary duct work was prefabricated by the Zia Co. on a University of California job order and furnished the contractor at the site.
 - d. "Steel ladder for shaft." The steel ladder for the shaft was fabricated by the Zia Co. by a University of California job order and furnished the contractor at the site.
3. All the above noted material was installed by the contractor in accordance with the plans and specifications.
