

27 January 1950

Thomas N.White Group Leader H-1

Ralph E.Gosline and Robert C.Weiss Monitoring Section H-1

T.A. Special Experiment

Reference H-1

W-3 group performed a special experiment at T.A.33 on 27 January 1950 under the direction of Commander James Dare and Lt.Edward Snyder. The experiment was the same as the one mentioned to you in a memo from Carl Buckland dated 14 November 1949.

The usual monitor's clothing was worn with the addition of Scott Air Packs during monitoring operations. Full face Fireman's Masks were worn by the W-3 personnel.

The butt end of the assembly did not break off. We believe this was due to the insertion of a tungsten, nickle, copper shock absorber in the assembly.

When checking for contamination no counts were found on either the assembly or the personnel.
