EXPERIMENT AT TA-33 ON AUGUST 3, 1953

H-1

The experiment took place at approximately 3:38 P.M. on August 3, 1953, at Area 9, TA-33.

The wind was in an easterly direction, blowing at approximately 5-10 m.p.h. The skies were clear. The shot was a very small scale shot; therefore, no clouds were visible at the time of checking. Highest reading at point of detonation was 5 on #5 scale.
