EXPERIMENT AT TA-33 ON DECEMBER 11, 1953

H-1

A series of three shots was carried out, the first shot going off at 11:30 A.M., the second shot at 1:50 P.M., and the third shot at 3:50 P.M. All three shots were on a very small scale. Surface wind at experiment time was from southwest. All three clouds dispersed very quickly and were not visible within two minutes after the shots. There were no fires located. Reading taken at site was 10 divisions on number 5 scale.
