EXPERIMENT AT TA-33 ON DECEMBER 18, 1953

H-1

A shot was carried out at TA-33 about 12:30 P.M. on December 18, 1953. This particular shot was on a smaller scale. Wind direction at experiment time was from southwest, dispersing very rapidly. Reading taken at site after shot was 10 divisions on #4 scale. There were no fires located after experiment.
