EXPERIMENT AT TA-33 ON DECEMBER 30, 1953

H-1

A series of two shots took place at TA-33 on December 30, 1953. The first shot went off at 12:35 P.M., and the second shot at 2:45 P.M. Wind direction was from the southwest, carrying the cloud in a northerly direction. Readings found at the site after experiment were the same on both shots, 5 divisions on #4 scale. There were no fires during the experiments.
