OFFICE MEMORANDUM

TO : Dean D. Meyer, Group Leader, H-1

DATE: February 4, 1954

FROM : Robert J. Elliott, General Monitoring Section, H-1

SUBJECT: SHOT AT TA-33 ON FEBRUARY 4, 1954

SYMBOL : H-1

The shot went off at 12:30 P.M., with the cloud rising very slowly over the top of the bunker. The fallout was pretty heavy. The reading taken at the bunker before I went to the shot point was 5 on scale 5. The cloud rose and went north at about 5 m.p.h. The shot point was checked and the reading found was 0 on scale 5. One of the counters caught fire and burned.

Area E?

The instrument reading indicates that this shot contained Tritium. I think it was in the south area of TA 33.
