Ms. Alison Dorries, ENV Division Director
Los Alamos National Security, LLC
Los Alamos National Laboratory
P.O. Box 1663, MS K404
Los Alamos, NM 87544

SUBJECT: Spill Response Assessment and Closure of Release ID# 2014-391 occurring at Technical Area (TA) 35-2 on September 3, 2014

Dear Mr. Turner and Ms. Dorries:

On September 4, 2014, representatives of Los Alamos National Security, LLC (LANS) verbally reported an unauthorized discharge to the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) as required under 20.6.2.1203 NMAC of the Water Quality Control Commission (WQCC) Regulations. The report identified a discharge from a container being prepared for recycle at TA-35-2 (Release ID# 2014-391). The incident resulted in the release of 100-150 gallons of mineral oil onto the underlying soil and adjacent asphalt south of TA-35-2. The release was contained within the impacted soil and asphalt areas. Los Alamos National Laboratory (LANL) reportedly used absorbent on the release. Impacted soil and asphalt were subsequently removed for proper disposal

Based on information submitted by LANS, corrective actions for this unauthorized discharge have been completed in a manner that is satisfactory to the GWQB. No further action is required at this time for release ID# 2014-391.

NMED reserves the right to require additional corrective actions should this incident result in the degradation of ground water quality. Further, nothing in this letter shall be construed as relieving the United States Department of Energy or LANS of the obligation to comply with all other applicable federal, state, and local laws, regulations, permits or orders.

Mr. Turner and Ms. Dorries
