Ch

The radioactive contaminated property located above ground in the Ten Site dump area has been reviewed for disposition. The attached listing gives a brief description of this material, its origin and recommended disposition.

All items are contaminated with radioactive materials and have been stored in this area for an extended period.

ENG-4 will handle the disposition of all materials, either by burial in the Ten Site dump or delivery to the location as noted. The Engineering Department will also document the disposition of the LASL structures as shown in the attached listing.
