RETURN RECEIPT REQUESTED

Handwritten: P. 484-098-954

Mr. Harold E. Valencia
Area Manager
Los Alamos Area Office, D.O.E.
Los Alamos, NM 87544

RE: NM0890010515

Dear Mr. Valencia:

In your letter of August 18, 1988 you referred to two surface impoundments in Technical Area 35 which have received and now contain hazardous wastes. These units are not reflected in the Part A notification forms required to be filed on all units subject to RCRA. These units therefore do not have interim status.

Please submit a properly completed EPA Form 3510-3 reflecting all the units at the Los Alamos National Laboratory which are subject to RCRA.

Please also submit with the completed form the following information:

- a. The date that these units were first sampled.
- b. The date that the laboratory results were received by the first University of California official to receive the results. Please also identify which official this was.
- c. The date that the laboratory results were received by the first Department of Energy official and who that official was.
- d. The date that the user groups referred to in your letter received notification to stop using the surface impoundments, who received the notice, what alternative procedures were implemented to ensure such use ceased and when did this occur.
- e. Copies of all correspondence related to items a through d above.
