RE: 0890010515  
TA35 Surface Impoundments

Dear Mr. Valencia:

The EID has received your letter of October 17, 1988, and one copy each of closure plans for TSL-85 surface impoundment and TSL-125 surface impoundment. In your letter you requested a prompt review of these plans. Before staff begins such a review would you please confirm what funding cycle DOE intends to use to implement any closure activities for these impoundments. With the limited staff resources available to the EID it is essential that all closure planning be carefully coordinated. When we receive your Part A listing these facilities and your response to the funding issue we will schedule appropriate plan reviews.

Sincerely,

C. Kelley Crossman  
Permitting Supervisor
