

MEMORANDUM

~~CONFIDENTIAL~~

TA 35

**DATE:** May 28, 1993  
**TO:** File  
**FROM:** Carl Stubbs, RCRA Permit Section  
**SUBJECT:** Meeting with LANL on Hydrothermal Processing Unit RD&D Permit Application

The meeting was held to discuss the Notice of Deficiency (NOD) for the LANL Hydrothermal Processing Unit (HPU) RD&D Permit Application. The meeting was attended by Jon Mack and Jody Plum of LAAO, Tony Griggs of LANL, and John Goode of AT Kearney (contractor).

The HPU NOD and LANL responses were discussed. The engineer certification may take longer than the time allowed for response. LANL will request an extension to June 23, which was agreed to. This should allow me enough time to prepare a letter acknowledging Administrative Completeness. If the extension is not enough time to provide the engineer certification, the Administrative Completeness will be acknowledged and the certification will be allowed to be submitted during July. These agreements will be documented in correspondence between NMED and LANL. LANL requested a timetable for permit draft completion and public notice. The Technical Review has already been completed and the draft completion and public notice will begin about August 1.

The site visit scheduled for June 2 was discussed.
