Subject: RE: MM/TS Sampling Notification

Neelam--Per our phone conversation today, it looks like we will be in the field no sooner than 15 days after our sampling notification after all. I apologize for the false alarm. We delayed our readiness review a few days to accommodate some of the extra requirements for work within the Pratt Canyon nuclear environmental site (NES) boundary, as well as to work out more of the fall protection issues for sampling the slope at TA-35. Right now, we are planning to begin field work (starting with the NES) on Tuesday, April 3rd. We believe we will start the work on the TA-35 slope approximately one week later (i.e., April 10th). The field work should be completed within 4 weeks. I will keep you posted of any changes as we progress.

Please call me with any questions or concerns you may have, and I hope you can come out for a field visit during this effort.

Thanks!
Becky

Subject: MM/TS Sampling Notification

Becky

I received your messages as well as your fax that you want to start sampling soon and have not been able to give us the required 15-day notice. I was out of the office Thursday and Friday. I'm approving the sampling notification for this sampling event as proposed in your March 16, 2007 letter, but in future please try to meet the 15-day notification requirement. Let me know when you'll be collecting samples at Mortandad Slope, I may be able to come and observe. Call me at 476-6040 if you have any questions.
