SUBJECT: **LANL WATER MONITORING SYSTEM TOUR.**

Dear Mr. Slaten:

This letter serves as a request by Hazardous and Radioactive Materials Bureau (**HRMB**) to tour all existing water monitoring systems at Los Alamos (**LANL**). A tour of the LANL water monitoring system would greatly aid in our understanding of the environmental surveillance that is being conducted at LANL thereby strengthening the communication between LANL and NMED. Correspondence between LANL and NMED could reduce overall spending and increase efficiency when examining water monitoring issues.

Mr. Alan Stoker of LANL EM-8 Group has been contacted and is acting jointly with this request. Currently his group is compiling a list of water monitoring data that HRMB has requested. A likely agenda will include one half day orientation and three field days. A tentative beginning tour date of July 13, 1992 is proposed. A list of NMED personnel that would be participating in this tour will be forthcoming. If you have any questions regarding this matter please contact Ms. Teri Davis of my staff at (505) 827-4300.

Sincerely,

Dr. Bruce Swanton
Program Manager
