RE: Response to Notice of Intent to Discharge; Discharge Permit Not Required for Discharges of Storm Water at Technical Area (TA) 36, Structure 86, AI:856 (PRD20150005)

Dear Mr. Grieggs:

The New Mexico Environment Department (NMED) received a Notice of Intent, as required, on July 10, 2015 to discharge approximately 50 gallons per minute of storm water from two recessed concrete lined pits located on the south and north sides of TA-36-86. Storm water from the pits will be pumped into a holding tank prior to discharge. Storm water removal is required to prevent the flooding of TA-36-86. The notice satisfies the requirements of Subsection A of 20.6.2.1201 NMAC of the New Mexico Water Quality Control Commission (WQCC) Regulations (20.6.2 NMAC). The proposed discharge is located in TA-36-86 at 35° 49' 34.5" North, -106° 15' 12.9" West, approximately 4.65 miles southeast of Los Alamos in Section 1, T18N, R06E, Los Alamos County.

Based on the information provided in the NOI, NMED has determined that a Discharge Permit is not required as long as the discharge is as described. A Discharge Permit is not required at this time because the information provided indicates it is unlikely that the discharge will adversely affect ground water quality.

However, because the information provided indicates that the discharge may occur to a watercourse, you are encouraged to contact NMED Surface Water Quality Bureau at (505) 827-2795 and the U.S. Environmental Protection Agency in Dallas at (214) 665-3152 to determine whether your discharge may require a National Pollutant Discharge Elimination (NPDES) permit.

37232

Anthony R. Grieggs, AI:856 (PRD20150005)

July 24, 2015

Page 2

Although a Discharge Permit is not being required for this discharge at this time, you are not relieved of liability should this operation result in actual pollution of surface or ground waters. Further, this decision by NMED does not relieve you of your responsibility to comply with any other applicable federal, state, and/or local laws and regulations, zoning requirements, plumbing codes, and nuisance ordinances.

If at some time in the future you intend to change the amount, character, or location of your discharge, or if observation or monitoring shows that the discharge is not as described in your Notice of Intent, you must file a revised Notice of Intent with the Ground Water Quality Bureau.

If you have any questions, please contact either Gerald Knutson at (505) 827-2996 or Steven Huddleson, Program Manager, at (505) 827-2936.

Sincerely,

Michelle Hunter, Acting Chief
Ground Water Quality Bureau
