Region 6
1445 Ross Avenue
Dallas, Texas 75203-2733

Dear Ms. Driscoll:

Some limited surface sampling activities are planned for Operable Unit 1132 starting the week of September 27. These field investigation activities are being performed prior to your approval of the Operable Unit 1132 work plan, which was submitted to you in June. It is advantageous to do this limited sampling now to provide a basis for next year's more extensive sampling. The limited sampling will conform to the sampling plan presented in the work plan submitted on June 16. In addition some geophysical survey work will investigate subsurface stratigraphy.

Not all of the approvals for this work have been received, even though we do expect to receive the last ones during the coming week. However, the sampling could be delayed, so we suggest that the sampling schedule be considered tentative. Please call me, Gene Gould 505-667-0402, or Dale Conover 505-662-7300 to verify that the sampling is proceeded according to the enclosed schedule, if that information is needed.

Sincerely,

Edward Norris
Programmatic Project Leader
