Thanks very much Luciana. We will get on this review ASAP so we can discuss it on the draft permit negotiations' OB/OD days. If we have any questions, we'll give you a shout.

John-

Here is an informal copy of the NOD response that is due today on the TA-16 Burn Ground Air Modeling Report. The actual transmittal should arrive by close of business today. I noticed that at least one of the copies we submitted with the response printed Appendix A of the submittal strangely (but still legibly) and I did not get a chance to print it again. I think that the original copy printed correctly, but I wanted to make sure that I mentioned the issue just in case I am wrong about the legibility of the strangely printed copy. In any event, the attached file shows the text as it should be. Please let me know if you have any questions. Thanks.
