OFFICE MEMORANDUM

TO : Carl Buckland, Leader, General Monitoring
Section
FROM : Dean D. Meyer, Group Leader, H-1
SUBJECT: CONTAMINATED WASTE DISPOSAL
SYMBOL : H-1

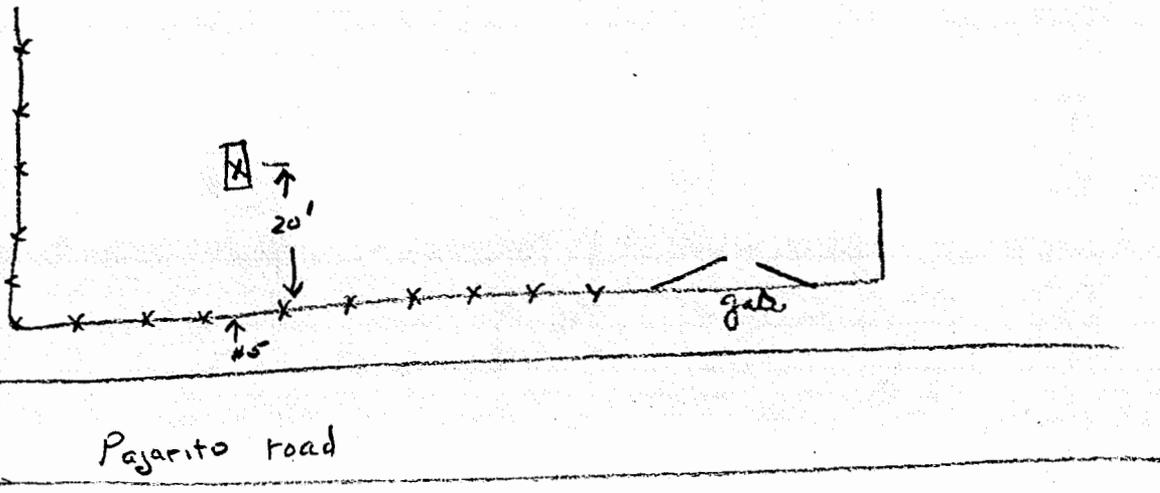

DATE: September 30, 1954

On the morning of September 29, a brass container, sealed with threaded caps on both ends, containing a glass tube with approximately 40 curies of tritiated ammonia was buried in the Pajarito Road contaminated dump. This container was placed 20 feet from the south fence, directly opposite coordinate sign number 5. The depth of the burial hole was one foot.
