DISPOSAL OF CONTAMINATED TRUCK BEDS

H-1

1241
7A 50
The beds of two trucks have been buried in our contaminated dump - Area C, Pit No. 6.

After several decontamination attempts the bed of the 2 ton Reo Truck, License No. 5536 read 20,000 c/m alpha and the bed of the 1/2 ton Ford Pickup, License No. 8349 had 10 mr/hr beta.

Due to the levels of contamination and numerous inaccessible surfaces, further decontamination attempts would not have been economically feasible.
