

OFFICE MEMORANDUM

TO : John Enders, Section Leader, H-1

DATE: 10-12-65

FROM : Gerald D. Eagan

SUBJECT: Back-fill of Disposal Wells at Area "C"

REASON: H-1, GMR

7A 5c
The purpose of this memo is to inform you that on October the twelfth five holes at area "C" were back-filled. I was instructed to inspect the holes at area "C" and to have the full ones capped with concrete.

I inspected the records and found that two 12 inch diameter holes contained their maximum amount of fissionable material. These two holes were capped. Their numbers are 101 and 106.

I then inspected the 36 inch diameter holes. Hole number 82 was dirt filled, but had never been concrete capped. To prevent water from continuing to run in this hole, I had it capped also.

Upon further investigation, holes 94 and 95 were found to be full. These were also concrete capped after their steel "lids" were removed.
