

OFFICE MEMORANDUM

TO : John Enders, H-1 Section Leader

DATE: June 8, 1967

FROM : Dean D. Meyer, H-1 Group Leader

SUBJECT: PROPOSAL FOR H-1 PERSONNEL SEALING DISPOSAL SHAFTS

SYMBOL : H-1

Your proposal for sealing disposal shafts with concrete mixed at the site by H-1 personnel is a good idea and you may proceed.

A cement mixer is available from H-7; you should arrange for a property transfer.

One point not covered in your proposal was cleaning up the equipment used. Some arrangements must be made to wash out the mixer, etc.

An operation of this type has safety problems associated with it and we must be sure that the men using the equipment are instructed to observe all safety measures. Also, material costs and labor records should be kept so we can evaluate the cost savings this plan will provide.

Dean D. Meyer
