Santa Fe, New Mexico 87105

Dear Ms. Fort:

RE: Amendment of Part A - Inclusion of TA 50 Incinerator

The enclosed amendment for our Part A permit application, as required by the New Mexico Hazardous Waste Management Act and associated regulations, is a request to include the controlled air incinerator located at Technical Area 50 under interim status. This incinerator was in operation prior to November 1980 and was used to burn radioactive waste contaminated with methanol and ethanol.

Since mixed (radioactive/hazardous) wastes will be regulated under proposed hazardous waste regulations, we feel the incinerator is eligible for interim status. This submittal supersedes all previous Part A submittals.

Sincerely,

  
Harold E. Valencia  
Area Manager
