EID DIRECTOR'S OFFICE

Dear Mr. Mitzelfelt,

I am deeply disturbed that ^{the} Los Alamos National Laboratories has been incinerating radioactive materials under a "research permit." I think it is seriously important that the Environmental Improvement Division issue an emergency order to prevent the burning of radioactive waste until the state of New Mexico can adapt standards in a public forum to regulate it. Also, any hearing relating to the incinerator should include both the hazardous waste & radioactive permits.

Thank you for your consideration -

Sincerely,
Michele Beinder
