Richard Mitzelfelt, Dir. EID
1190 St. Francis Dr.
Santa Fe, NM 87503

Sir:

I am writing to express my deep concern about the proposed burning of radioactive hazardous waste by Los Alamos National Lab.

It is very important -- and I demand -- that the EID issue an order to prevent burning of radioactive waste until the State of New Mexico adopts standards in a public forum to regulate it.

It is very important -- and I demand -- that any hearing relating to the incinerator should include both the hazardous waste and radioactive waste permits.

Sincerely,

A handwritten signature in cursive script that reads "Carolyn Vantress".
