Richard Mitzelfelt, Director of E.I.D.
1190 St. Francis Dr.
Santa Fe, NM 87503

Dear Mr. MITZELFELT:

I AM writing to urge you to issue an emergency order to prevent the burning of radioactive wastes at Los Alamos. The St. of N.M. is in urgent need of adopting standards that the public agrees with in order to regulate such burning of radioactive wastes. You know, as well as I do, that a small, very small fraction of plutonium in the lungs has an excellent chance of causing lung cancer. If you don't care enough, that you would allow Los Alamos to poison the people of this land with one of the most deadly substances known to man, then God help you, as well as many of the people of this community deserve to live here without this insidious threat. God help you if you choose to participate in such a horror. Please take correct action. Thank you.
Sincerely, Jana Gurtis
