

MEMORANDUM OF MEETING OR CONVERSATION

<input checked="" type="checkbox"/> Telephone	<input type="checkbox"/> Personal	Time 8:40	Date June 26, 1989
Originating Party Michael Aaron 758-3522		Other Parties Elinor Gordon EID	
Subject LANH incinerator			

Discussion

Environmental Assessment done at LANH recently and is undergoing internal review. The EA is specific to this incinerator. Is it possible to have that sent up to the EID office. Questions re. LANH draft permit:

- 1) Can permit be denied if LANH's efforts at waste minimization are inadequate.
- 2) Has LANH considered the ^{on-site} immobilization of mixed waste with clay and cement. Studies done re. WIPP have indicated that such on-site immobilization is adequate for 20-100 years.

3) DOE is to have similar incinerators at several of its facilities throughout the country. Has DOE considered the accumulative effect of burying radioactive waste when all incinerators are up + going? *Is LANH burning radioactive waste during FS?

- 4) Can EID require maintenance of pollution control devices. Seems to be lacking in draft permit.
