Santa Fe, NM 87503

Dear Mr Mitzel felt;

I had the opportunity to watch your face with your name at the hearing June 17th about Santa Fe Alloys in San Miguel County. I felt that you were sincerely attempting to resolve the problem for the citizens there. You were honest and forthright and had the courage to admit there was much unknown about the situation. Thanks.

Now we have the radioactive air problem at LANL. The hearings, as you know, are set for July 18th. Please issue an emergency order to prevent radioactive burning until our beautiful state has standards in a public forum to regulate it. The hearing should include both the hazardous waste & radioactive permits.

I hope your willingness to help the people of Rivera will extend to the

people of Santa Fe,

Thank you for your
consideration

Sincerely
Barbara Towle
