

Pot Creek Box 6

Luncheon de Roos, NM 87057

July 7, 1989

Dear Mr. McHelfelt:

We strongly oppose the permission granted to Los Alamos Incinerator to operate before the State of NM has adopted any standards for regulation of radioactive emissions. We feel it is imperative that EID issue an emergency order to prevent the burning of radioactive waste until regulations have been adopted in a public forum. Furthermore, any hearing relating to the incinerator should include both the hazardous wastes and radioactive permits.

We do not want our air ruined by toxins and radioactive. It is the only air we have.

Sincerely,

TR C. Jameson Wells
