

Rt. 7, Box 125 SC
Santa Fe, NM 87505
July 10, 1989

Dear Mr. Mitzelfelt:

We are shocked to learn that our state has no regulations governing radioactive emissions from incinerators at Los Alamos, and that the forthcoming hearings on the LANL incinerator will cover only hazardous, but not radioactive waste. It is inconceivable that our state will allow this to happen. We demand that the EID issue an emergency order, under the NM Air Quality Control Act, Sec. 74-2-10 preventing the burning of radioactive waste until standards for this are adopted. We also want the projected 7/17 hearing to include the need for permits for radioactive waste.
