

Jack

July 10, 1989

Dear Mr. Mitzelfelt,

As a former information officer of the U.S. Atomic Energy Commission in Washington, I am writing to urge the Environmental Improvement Division to issue an emergency order under the state Air Quality Control Act to prevent any burning of radioactive waste by Los Alamos National Laboratories until the state adopts standards to regulate this practice. Such a ban should apply also to other toxic wastes.

RECEIVED
JUL 11 1989

Sincerely,
Truman Tempie
