Mr. Richard Mitzelfelt, Director  
New Mexico Environmental Improvement Div.  
1190 St. Francis Drive  
Santa Fe, NM 87503

Dear Mr. Mitzelfelt,

I am writing you regarding the upcoming hearing for the Los Alamos National Laboratories Waste Incinerator.

I am strongly opposed to the operation of this facility in any way, shape or form! I therefor request that you and your department issue an emergency order to prevent burning of radioactive wastes at this or any other facility until the State can adopt concientious standards in a public forum. I further request that any hearings related to the incinerator should include both the hazardous waste and radioactive waste permits. If this facility is allowed to operate without these safeguards I will hold you personally responsible for the resulting pollution, illness, and death!

I hope that you will demonstrate the concientious responsibility placed in you by the public trust. Thank you for your consideration.

Sincerely,

Daniel Owsiany  
cc: CCNS, Governor Garry Carruthers
