

Dear Mr. Mitzelfelt - July 11 '89  
Supposedly, we live in a  
Scientific Age - it is imperative  
that we protect human life  
and well being. This means  
that we should not allow  
burning of hazardous wastes  
until we know what we are  
doing! You and EID have an  
important Trust! We depend on you.  
Sincerely, Betty F P Berchtold
